HANRO.COM

ELIXIR OF SUMMER

All of existence consists of the four basic elements of fire, water, air, and earth. These are the elixirs of life. Each element is associated with a specific color that embodies certain characteristics. This has inspired the Spring/Summer 2019 campaign.

Natural, pure, clear, and as durable as the Earth itself - adding in the lightness of air teamed with innovation and modernity. However, HANRO also burns like fire for self-confidence, passion, and a love of detail. In addition, the soft, flowing, and exquisite fabrics call to mind the element of water. Each of the four release dates represents an element. Each release date has its own color concept – earthy tones, airy, light blue nuances, fiery red, and fresh lilac and green tones.

ELIXIR OF SUMMER

All of existence consists of the four basic elements of fire, water, air, and earth. These are the elixirs of life. Each element is associated with a specific color that embodies certain characteristics. This has inspired the Spring/Summer 2019 campaign.

Natural, pure, clear, and as durable as the Earth itself - adding in the lightness of air teamed with innovation and modernity. However, HANRO also burns like fire for self-confidence, passion, and a love of detail. In addition, the soft, flowing, and exquisite fabrics call to mind the element of water. The three release dates of the menswear collection combine these four elements in a cohesive color concept – from burnt, earthy red tones and blues reminiscent of the air and water, to the sandy beige shades of the hot Sahara desert.

MODERN RELAXATION

CASUAL S/SLV SHIRT **07 5037** STONE MELANGE
