

TRINITAS

IX

TRINITAS creates its own visual world. It abstracts, dis-assembles and puts things into new contexts, without judging about the origin, its beauty or ugliness. By working only with black and white, contrasts are neutralised and compositions can be reinterpreted.

TRINITAS does this by combining different materials and printing techniques and by using non-standard cuts. New collections are released as VOLUMES, and each of them has their own topic.
